

!  
**Yes.**

# **FLEX TINT™**

Right Color | Right Quantity | Right Now

*Top half has 1 coat. Bottom half has 2 coats. Left side was sanded smooth. Right side was blasted.*

Each color was matched on:

- Smooth wood (the boring, — and insufficient — industry standard)
- Blasted wood (because smooth isn't the name of the game in log home finishing)
- One coat; and
- Two coats

Some colors took twenty formulas, some took five. A consistent match was the goal...*and the result.*

**Don't give up on boxing different lot numbers!** As with any stain, there will still be lot-to-lot variances, so keep boxing those different lot numbers.
