

Discontinued Color Transition Options

We have options to get you through this transition.

Conceal Transition Options

Conceal Gold Tone and Harvest Wheat are very close to the same color, so Harvest Wheat will be the natural choice for most people. In some cases, Frontier Gold may be a better choice. Always match Conceal to the final stained wood, rather than bare wood. If choosing between two colors, choose the darker of the two.

Transformation Siding & Trim Color Transition Options

On the following page, you'll find each discontinued color and the colors of each stain brand that closely complement it. As always, get samples to test before deciding. It's generally better to go slightly darker to get more even results.

If Going to Bare Wood	If Doing Routine Maintenance
<p>Now's the ideal time to switch to either Sashco's Capture® and Cascade® system or Transformation Log & Timber, both of which are more durable than Transformation Siding & Trim.</p>	<p>Power wash to clean the surface and remove all surface erosion, dust, pollen, etc.</p> <p>Option 1: Recoat with Sashco's Capture & Cascade Log Staining System, applied according to directions. (Consider going slightly darker than the current stain to help hide any imperfections.) Sample different colors to be sure you get the look you want.</p> <p>Option 2: Recoat with more Transformation Siding & Trim in a color close to the original.</p>
